GSF shares the announcement of Elodie Michaels as an Executive Advisory Board Member at Re-Nuble and its equity investment at Re-Nuble.

Mahwah, NJ, August 28, 2020 – Global Sustainable Future (“GSF”) is pleased to share the appointment of Ms. Elodie Michaels to Re-Nuble’s Executive Advisory Board and its equity investment in the firm. Re-Nuble is a minority-owned NYC AgTech company that addresses the food waste epidemic by uniquely converting food waste into organic fertilizers for soilless farms.

“It has been our dream to attract talent, industry expertise, and strong financing acumen represented by Ms. Elodie Michaels and have Global Sustainable Future as an investor/partner. With our innovation, comes the responsibility of providing education to the market demonstrating that there is value in the circular economy. Ms. Michaels gets it and her membership is a direct signal to the market that there are market-based dynamics and drivers supporting what we do” Tinia Pina Founder &CEO

About Re-Nuble: Re-Nuble is an MWBE-certified agriculture technology company that uniquely converts food waste into commercial-grade organic hydroponic nutrients for soilless farming. We strive to be the world’s enabler of closed loop food. We make this possible by our organic cycling science method. By diverting the valuable resource of food waste from entering landfills, we successfully eliminate a significant amount of methane emissions that would have been circulating in our ecosystem. Our proprietary nutrient delivery system, enables soilless farms to rapidly convert waste streams into water soluble compounds for quicker plant uptake and yields comparable to the current dominant fertilizer, synthetic mineral salts. Re-Nuble’s current product caters to hydroponic farms, enabling them to produce more profitable organic produce with fertilizers at half the cost of inorganic equivalents. These soilless farms can more competitively enter the growing organic produce market, growing 2.5 times faster than total food sales in 2018 (Organic Trade Association), continuing a multi-year trend.

About Global Sustainable Future: GSF addresses challenges in energy, air and water by advancing, innovative, disruptive businesses with market access, capital and project financing. GSF further develops and navigates growth strategies in and between North America and Europe by leveraging an existing family office infrastructure of 20+ businesses, local market expertise and our professional network.

ELODIE MICHAELS helps clients develop and execute business growth and market outreach strategies.
